

MEDISYS ONE

Concierge Service

SUCCESS STORY

-ERIC-

“My wife and I have been Medisys One members for almost a year now, and as we reflect over the year, it is probably the best investment we’ve ever made.”

After their family doctor retired, Eric and his wife suddenly found themselves without a family doctor and were finding it increasingly difficult to get the medical attention they required. Eric had been a Medisys Executive Health client for a number of years and decided to consult the Website for more information about Medisys One. Once he read up on the services, he immediately signed up both he and his wife.

Since becoming a Medisys One client, Eric has used the service a number of times. During those times, two incidences in particular have set Medisys apart in Eric’s eyes, in terms of the service he received and the medical staff’s high level of competency.

The first incidence occurred during a trip to Florida, when Eric became ill and was admitted to the hospital. He contacted the Medisys One Concierge Service and received an immediate response. Within an hour of being admitted, his complete medical file had been faxed to the hospital in Florida and Eric received the prompt treatment he required.

“To his relief, the doctor at the Medisys clinic was able to diagnosis the problem quickly, and the Medisys staff was able to help him find the right specialist, and a short time later, schedule his appointment for surgery.”

The second incidence took place after Eric had been experiencing pain for quite some time and had consulted other doctors without receiving an accurate diagnosis. **To his relief, the doctor at the Medisys clinic was able to diagnosis the problem quickly, help him to navigate the healthcare system to get him an appointment with a specialist, and a short time later, for surgery.** To him, it was a testament of Medisys’ “medical competency and consistent delivery on all fronts”.

“We simply can’t say enough about our experience with Medisys One and the staff at the clinic who are a pleasure to deal with. Their attention to detail, follow up and diagnosis are superb. We have the utmost faith and confidence in placing our health in their hands.”

Eric goes on to say that he never hesitates to recommend the Medisys One service to his friends and family. “Rest assured that we make no bones about the fact that we feel Medisys One is outstanding and we would never consider changing.”

About Medisys One

The Medisys One service provides a comprehensive preventive health assessment by a specialized physician; direct contact with a team of nurses and physicians in the event of serious medical issues 24 hours a day; a team of health professionals to coordinate specialist appointments, facilitate second opinions and provide prescription renewals as required; and attentive, rigorous and proactive follow-up to help find the best treatment options available in Canada and abroad.
